EDUCATION

Kennesaw State University, Marietta, GA
Bachelor of Science in Computer Science

Expected in 05/2026

Coursework: Data Structures, Computer Architecture, Operating Systems, Fundamentals of Data Communication, Software Engineering, Discrete Math, Parallel&Distributed Computing, Algorithm Analysis, Database Systems, Cryptography

WORK EXPERIENCE

Assurant, Atlanta, GA
IT Intern

Aug 2025 - Present

- Developed a custom CI/CD pipeline using GitHub Actions to automate testing and deployment of custom API connectors for unsupported applications, ensuring reliable data retrieval across enterprise systems.
- Collaborated with a team to integrate a third-party SaaS platform into the enterprise infrastructure, helping with software access audits and enhancing license management.

Kennesaw State University, Marietta, GA
Lead Python Tutor / Lab Assistant

Aug 2024 - August 2025

- Provided one-on-one and group tutoring sessions in Java and Python to 300+ students, enhancing their understanding of key programming concepts.
- Assisted approximately 80 students a week with debugging code, clarifying complex algorithms, and optimizing program performance in their lab class, contributing to their academic success.
- Recognized for having the highest number of tutoring appointments in the Spring 2025 semester, with 330 total sessions, demonstrating exceptional student trust, reliability, and a consistent commitment to academic support.

SKILLS

Languages: Python, Java, Bash, Go, C#, SQL, PowerShell

Concepts: Automation, CI/CD, Object-Oriented Programming, Data Structures, Test-Driven Development

Developer Tools: Git, Linux, Docker, Azure DevOps, GitHub, GitHub Actions, Confluence, Postman

RELEVANT PROJECTS

Babble Bridge | 1st Place Hackathon Project | TypeScript, React Native, Expo, Firebase, Google Translate API

- Helped develop a real-time multilingual chat application that allows users to communicate effortlessly across languages by automatically translating messages into each participant's native language.
- Integrated the Google Translate API, enabling real-time message translation in 200+ languages, allowing seamless communication between users speaking different languages.
- Developed and optimized the translation process to ensure messages are translated quickly, with less than a 1000ms delay for messages to propagate across multi-user chatrooms.

Toolbelt | Python, Bash, Linux

- Developed an open-source command-line interface (CLI) tool designed to assist users in efficiently storing, organizing, and managing frequently used terminal commands, greatly reducing command search time.
- Leveraged the Click library to manage command execution, arguments, and subcommands across Linux platforms, ensuring smooth and intuitive interaction for users.
- Designed the tool to be modular and extendable, allowing easy integration of future features and expansions to accommodate more advanced user needs.
