GOAL

I am passionate about learning and eager to apply my skills to solve real-world challenges and advance in the tech industry. With experience in tutoring, software engineering, and customer service, I have developed a strong ability to efficiently work in a team and drive impactful solutions.

EDUCATION

August 2022 - Dec 2026

Bachelor of Computer Science

Kennesaw State University

- Senior
- GPA 3.86
- Expected Graduation - Fall 2026

SKILLS

Java	Next Js	Git
SpringBoot	React	C
Python	Javascript	Docker
SQL	Algorithm Analysis	Data Structures

PROFESSIONAL EXPERIENCE

Tutor, Kennesaw State University

Dec 2023 - August 2024

- Tutored Calculus 1 and 2, Linear Algebra, Discrete Mathematics, and Physics 1
- Helped students transition from failing to passing grades in core STEM courses through personalized learning plans
- Supported underperforming students by identifying learning gaps

Server, Prime 120 Steakhouse

June 2024 - Current

- Built strong rapport with regular customers, contributing to an increase in repeat business
- Managed up to 6 tables during high-traffic events, ensuring accurate and timely orders
- Trained new team members, reducing onboarding time and improving team performance
- Resolved customer complaints effectively, turning issues into positive experiences and maintaining brand reputation

PROJECTS

Eezy Recipeezy

- [Won 2nd Place at Kennesaw State University's AI Club 2024 Hackathon](#)
- Recipe generating AI trained using the SmolLM2 AI Model on 2.2 million recipes
- Front end done in react with a working speech to text feature
- Adapts to whatever ingredients you have and fills in the gaps if unrealistically few ingredients are listed

Event Friend

- Built a social event-matching web app with Next.js, Firebase, and Tailwind
- Implemented full auth flows and editable user profiles with image upload via ImageKit and a secure Next.js API route
- Added real-time UX touches to keep the interface responsive and user-friendly.
