EDUCATION

Kennesaw State University, College of Computing and Software Engineering

Marietta, GA

Bachelor of Science in Computer Science

December 2025

GPA: 3.95 | Honors/Awards: President's List (4 semesters) | Upsilon Pi Epsilon (Computing & Information Honors Society)

Relevant coursework: Programming Problem Solving I/II, Data Structures, Algorithm Analysis, Intro to SWE

Cloud Software Development, Software Testing & QA, Intro to Databases, Technical Writing

[CodePath](#)

Remote

Technical Interview Prep

September 2025 - December 2025

SKILLS & CERTIFICATIONS

Languages: Java, Python, C++, JavaScript

Web: HTML, CSS, Next.js

Tools: Git, Github, JUnit, Jupyter Notebook

EXPERIENCE

Kennesaw State University - CCSE Tutor/Lab Assistant | Marietta, GA

January 2025 – Current

- Tutored students in Java and Python, improving problem-solving skills, debugging abilities, and code comprehension.
- Assisted GTAs in lab sections, increasing one-on-one instructional support and enhancing learning outcomes for larger student groups.
- **Employee of the Month** for August 2025

Delivery Expert - Domino's Pizza | Smyrna, GA

March 2020 – September 2025

- Managed high-volume deliveries (20–30+ per shift) with accuracy, demonstrating strong organizational and time-management skills.
- Maintained efficiency and attention to detail under tight time constraints in a fast-paced environment.
- Applied process-oriented thinking to optimize routes and ensure consistent, reliable service.

Package Handler - FedEx | Kennesaw, GA

March 2020 – August 2020

- Processed 300+ packages per hour in a fast-paced environment, ensuring accuracy and operational efficiency.
- Adapted quickly to shifting priorities and workflow changes, including integrating partially completed loads.
- Maintained strict adherence to safety and procedural protocols, minimizing errors and operational risk.

PROJECTS

Store Simulator and File Counter - Developer | Individual

GitHub | CS3502-Project-1

- Demonstrated understanding of threading at four levels, resolving race conditions and deadlocks sequentially to improve process synchronization.
- Implemented inter-process communication using pipes to reinforce OS concepts and data flow management.
- Utilized Git branching workflow to manage each stage of the project, demonstrating version control best practices.
- Created in-depth documentation using LaTeX to explain design decisions, implementation details, and testing outcomes.
- Utilized: C++, VirtualBox, Linux (Ubuntu), Git, LaTeX

8 Puzzle Generator & Solver - Developer | Individual

- Generated random 8-tile puzzles and ensured solvability for testing search algorithms.
- Implemented A* search algorithms and supporting data structures to efficiently solve puzzles.
- Measured performance by calculating execution times and search space explored for each algorithm.
- Utilized: Java
